**Cystic Fibrosis (CF)** is a genetic, life-threatening lung disorder that affects **more than 30,000 people** in the U.S. alone. Each year, more than **2,500 cases** are diagnosed, and the median life expectancy is 36.8 years of age. Although there is **currently no cure** for CF, c**ardiovascular exercise** helps **improve the quality and length of life** for CF patients.

**What can you do?** Join **Boomer Esiason Foundation's (BEF) Team Boomer - Fighting Cystic Fibrosis** in supporting cystic fibrosis. BEF realizes the **importance of exercise** to improve quality of life whether you have cystic fibrosis or not. Each athlete will participate in a race, and the money they raise will go toward the **BEF Exercise for Life Scholarship Program**.

**GOAL** - to award **10 - 15 scholar-athlete scholarships** to CF patients based on athletic, financial, and academic success so that these individuals will be Living Breathing Proof that individuals with CF can have a full life. **Every dollar you donate** will provide scholarship money to people who once did not have a bright future.

**Join us in helping Cystic Fibrosis patients achieve their dreams.**
